
Flask-CLI Documentation

Release 0.1.0

Invenio Software

July 31, 2015

1	Installation	3
2	Usage	5
3	Changes	7
4	Contributing	9
5	License	11
5.1	Authors	12
	Python Module Index	13

Flask-CLI is a partial backport of Flask 1.0 new click integration to v0.10.

Do not install this package if you use Flask 1.0+.

Full documentation of Flask's new click command line integration can be found at: <http://flask.pocoo.org/docs/dev/cli/>.

Installation

The Flask-CLI package is on PyPI so all you need is:

```
$ pip install flask-cli
```

Usage

Use this library as fallback when importing from `flask.cli`.

```
try:
    from flask.cli import FlaskGroup
except ImportError:
    from flask_cli.cli import FlaskGroup
```

Note Flask-CLI is only a backport of `flask.cli`. Most notably, there's no integration into the Flask application object. E.g. the following won't work:

```
app = Flask(__name__)

@app.cli.command()
def initdb():
    """Initialize the database."""
    print 'Init the db'
```

Changes

Version 0.1 (released 2015-07-31)

- Initial public release

Contributing

Bug reports, feature requests, and other contributions are welcome. If you find a demonstrable problem that is caused by the code of this library, please:

1. Search for [already reported problems](#).
2. Check if the issue has been fixed or is still reproducible on the latest *master* branch.
3. Create an issue with **a test case**.

If you create a feature branch, you can run the tests to ensure everything is operating correctly:

```
$ ./run-tests.sh
```

You can also test your feature branch using Docker:

```
$ docker-compose build
$ docker-compose run --rm web /code/run-tests.sh
```
